SciBase announces changes to the Management team

Linn Olsen, SciBase's head of production and supply chain, has been appointed as a member of the management team.

"Our manufacturing of single use electrodes is of strategic importance to the Company and one of our more important projects going forward is to streamline the manufacturing process and increase the production capacity. Therefore, it is only natural that Linn, who started at SciBase in August, now becomes a member of the management team. With Linn on the team we get important strategic competence into the management team", says Simon Grant CEO SciBase.

About SciBase and Nevisense

SciBase AB is a global medical technology company based in Stockholm, Sweden that develops unique point-of-care devices for the evaluation of skin disorders such as skin cancer and atopic dermatitis. SciBase's first product, Nevisense, helps clinicians detect melanoma, the most dangerous type of skin cancer. Further development has led to Nevisense also being used as a tool to assess the skin barrier and non-melanoma skin cancer. Nevisense is based on substantial research and has achieved excellent results in the largest clinical study ever conducted on the detection of malignant melanoma. Nevisense is CE marked in Europe, has TGA approval in Australia and an FDA approval (PMA) in the United States. SciBase technology is based Electrical Impedance Spectroscopy (EIS) combined with Artificial Intelligence (AI) algorithms that interpret the varying electrical properties of human tissue to detect malignancies and abnormalities. SciBase Holding AB is listed on First North Growth Market ("SCIB"). Further information is available at www.scibase.com.
