

SciBase launches next generation Nevisense

SWEDEN – April 11, 2025 - SciBase Holding AB ("SciBase") [STO: SCIB], a leading developer of augmented intelligence-based solutions for skin disorders, is proud to announce the launch of the next generation of Nevisense; Nevisense V.

The new platform features an updated user interface, enhanced display resolution, and an upgraded, more user-friendly touchscreen. Beyond these hardware enhancements, Nevisense V offers new features specifically designed for both skin cancer diagnostics and research applications.

"I am proud to announce the launch of our next generation of Nevisense," said Pia Renaudin, CEO of SciBase. "This newly released version includes several exciting features and enhancements. We have also strategically prepared the platform for future expansion into new markets and clinical indications.

With Nevisense V, SciBase continues its mission to advance noninvasive solutions that support earlier diagnosis and improved patient outcomes in dermatology.
